

ARCHA SATHEISH

AI & Machine Learning Engineer — Artificial Intelligence & Data Science Graduate
Pala, Kerala | +91-8590671965 | satheisharcha3@gmail.com | linkedin.com/in/archa-satheish-a5796627b

Professional Summary

Artificial Intelligence and Data Science graduate with experience in Machine Learning, Deep Learning, NLP, Computer Vision, and FastAPI backend development. Skilled in building AI-powered applications using Python, TensorFlow, OpenCV, and React Native, with strong analytical and problem-solving abilities.

Technical Skills

Languages: Python, JavaScript, SQL

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, Neural Networks

Frameworks/Libraries: FastAPI, TensorFlow, OpenCV, MediaPipe, React Native

Tools: Git, GitHub, VS Code, Jupyter Notebook

Core Skills: API Development, Backend Development, Real-Time Processing

Education

SJCET, Palai

2022 – 2026

B.Tech in Artificial Intelligence & Data Science — CGPA: 8.5/10

Alphonsa Residential School

2020 – 2022

Higher Secondary Education — 92.5%

Internship Experience

AI & Backend Development Intern

Capsdata Technologies Pvt. Ltd.

- Developed taxonomy generation pipelines using Python and FastAPI.
- Worked on backend workflows, scalable architectures, and API integration.
- Improved structured data organization and processing efficiency.
- Gained practical exposure to AI-based backend systems and deployment workflows.

Projects

Thought Mirror

AI-Powered Journaling Platform

- Developed an AI-powered journaling platform for emotional analysis and productivity tracking.
- Integrated NLP models such as T5 and MiniLM for intelligent reflection generation.
- Built scalable backend APIs using FastAPI and integrated React Native frontend support.
- Implemented privacy-focused features and AI-based career guidance functionalities.

Foot Length Measuring System

Computer Vision Based Measurement System

- Built a real-time foot measurement system using OpenCV and MediaPipe.
- Implemented image-processing techniques for accurate object detection and measurement.
- Used coin-based calibration methods to improve measurement precision.
- Enhanced real-time performance and automation through computer vision workflows.

Vehicle Detection & Tracking System

Real-Time Surveillance Application

- Developed a real-time vehicle detection and tracking system using Python and OpenCV.
- Implemented object detection and motion tracking techniques for surveillance applications.
- Improved traffic monitoring efficiency through automated vehicle analysis.
- Enhanced detection accuracy and optimized frame processing performance.

Smart Healthcare Connect

AI-Assisted Healthcare Platform

- Designed an AI-assisted healthcare platform with chatbot integration and medical support features.
- Developed pill reminder functionalities and medical report analysis modules.
- Applied NLP techniques for conversational healthcare assistance and text processing.
- Built scalable backend services using FastAPI for healthcare-related workflows.
